Front-End Developer — 5 Years of Experience

EXPERIENCE

Williams Sonoma Inc - San Francisco, CA

04/2021 - Present

Web Developer, Brand Front-End Developer - Pottery Barn

- Build and maintain UI/UX components by translating design specifications into responsive, accessible CSS and JavaScript, ensuring consistent cross-browser behavior across the WSI e-commerce platform.
- Collaborate cross-functionally with Site Management, Creative, and Engineering teams to deliver fully tested bi-weekly releases, including UI/UX redesigns and feature updates.
- Develop and maintain Vue.js components with full unit test coverage using Jest, contributing to a high-quality, maintainable codebase.
- Leverage AEM's custom JS component to rapidly implement page functionality changes using vanilla JavaScript.
- Maintain QA and UAT environments through branch rebasing, manifest updates, and Jenkins job execution.
- Design and lead technical interviews to evaluate candidates' coding ability, problem-solving skills, and cultural fit for software engineering roles.

Web Developer, Rapid Experimentation Team

- Implement A/B tests across the WSI e-commerce platform, translating experiment specifications into clean, production-ready code.
- Configure and launch experiments in Adobe Target, setting up activities, audiences, offers, and traffic allocation for each test.
- Integrate tracking and analytics hooks within experiments to capture user behavior data and support measurement of test performance.
- Review A/B test results to understand experiment outcomes and inform future implementation decisions.

Turner Engineering - Remote

04/2025 - 12/2025

Front-End Developer and Data Engineer, Independent Contractor

- Developed Vue 3 and D3.js applications visualizing potential time savings from syncing SF Metro vehicles with traffic signals. [Live Demo](#) | [Github](#)
- Automated traffic data collection from the [511.org](#) SF Bay API using custom JavaScript scripts to process, curate, and serialize data to JSON. [Github](#)
- Implemented CI/CD pipelines via GitHub Actions for automated testing and deployment of Vue 3 + D3.js applications.
- Migrated the full application to React while maintaining feature parity with the original Vue 3 implementation.
- Enforced code quality standards using ESLint and Prettier; built UI with Vuetify component library. [Live Demo](#) | [Github](#)

EDUCATION

University of California, Santa Cruz

09/2016 - 06/2019

Bachelor of Arts, Computer Science

University of Washington, Seattle WA

09/2014 - 03/2016

Pre-Computer Science Major

SKILLS & COMPETENCIES

Front-End: JavaScript (ES6+), Vue.js, React, Vite, D3.js, HTML, CSS, Jest, SASS, Bootstrap, Prettier, ESLint

Back-End & Tooling: Node.js, PostgreSQL, MySQL, Git, Jenkins, Github Actions, NPM, Bash

Testing & QA: A/B Testing, UAT, Cross-browser QA, Adobe Target, Omnibug, Jest

Design & UX: Figma, Photoshop, Illustrator

AI Tools: GitHub Copilot, Figma MCP, Cursor, Claude, ChatGPT, Google Gemini
